01 SUMMARY

Final-year computer engineering student at Ege University and co-founder of Servis Now. I've been building mobile apps with Flutter for four years and enjoy working across the whole product, from the backend to AI-powered features. Lately I've been focusing on combining software development with machine learning.

02 EXPERIENCE

Co-founder & CTO — Servis Now 07/2025 – present

- Building all software for a real-time shuttle-tracking platform: backend, web admin panel, and parent and driver mobile apps.
- Responsible for the end-to-end technical architecture and the startup's business development.

Software Engineering Intern — Yapı Kredi 2026 – present

- Architectural work on a modular C++17 codebase; comparing runtime polymorphism with compile-time alternatives.

Intern, Embedded Systems — Aselsan 08/2026 – 09/2026

- Internship on the embedded systems team.

Chair, Computer Society Committee — IEEE Ege Student Branch 2024 – 2025

- Coordinated the committee's technical events and project teams.

03 PROJECTS

LocaleChat — Location-based messaging app. 02/2024 – 01/2025

My Apartment — Apartment management app I contributed to. 05/2024 – 07/2024

MyLibrary — Mobile agenda app for books, series and films. 08/2023 – 12/2023

CurrencyApp — Stock-market tracking app built as a team in the university club. 01/2023 – 06/2023

04 EDUCATION

Ege University

B.Sc. Computer Engineering

2022 – 2027

GPA 3.60 / 4.00

05 SKILLS

LANGUAGES

Dart, Python, Java, JavaScript, SQL

MOBILE

Flutter, Firebase

BACKEND

FastAPI, RESTful API

INFRA

AWS, Git, GitHub

AI / ML

Machine learning, data processing

06 LANGUAGES

TURKISH

Native

ENGLISH
